ReactJS, HTML, CSS, Figma, MongoDB, ExpressJS, MaterialUI

- I worked there for some time to develop the web pages for them. Here I learnt team management. How to use social platform to promote our work and many more.

PROJECTS

RADIO APP:

This application highlights my knowledge of API call. I used radio API to fetch data. And user can filter data according to state, country, language etc. I used Figma to design and ReactJS to build. Link: <https://bit.ly/2OV1r6u>

MUSIC APP CLONE:

This application is written in pure HTML and CSS. I built this application as a fun project. Link: <https://bit.ly/3wXLDkx>
